### Restriction Requirement

#### 35 U.S.C. § 121

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- a. Group I, claim(s) 1-6, drawn to a **method for identifying putative antiviral agents** using a **ligand-receptor binding assay**, classified in class 435, subclass 7.1.
- b. Group II, claim(s) 7-11, drawn to a **method for identifying putative antiviral agents** using a **host cell** expressing a polypeptide, classified in class 435, subclass 7.2.
- c. Group III, claim(s) 12-14, drawn to a **method for detecting HIV-infected patients** using a polypeptide, classified in class 435, subclass 5.
- d. Group IV, claim(s) 15-20, drawn to a **method for treating HIV-infected patients** by administering a modulator, classified in class 435, subclass 5.

Applicant is further advised that a specific polypeptide (e.g., one of 9145, 1725, 311, 837, etc.) must also be elected pursuant to 35 U.S.C. § 121. Each polypeptide has a unique structure, function, and physicochemical properties thereby necessitating separate searches. Applicants are reminded that the claims must be amended to reflect the election where appropriate.

The inventions are distinct, each from the other because of the following reasons:

#### *Unrelated Inventions*

Inventions I-IV are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04 and § 808.01). In the instant case, each group is directed toward a a different

scientific objective (e.g., screening assays, diagnostic assay, treatment regimen) that employs different scientific reagents and assay steps thereby necessitating separate searches. Each group is clearly directed toward a different inventive concept.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and require separate searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143). Applicant is also advised that the claims should be amended to reflect the election, where necessary.

**37 C.F.R. § 1.48(b)**

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
